Thanks to the evaporator built into the freezer walls, which is completely invisible, ice buildup on the interior walls is significantly reduced. This leads to less frequent defrosting and ice melting needs. If defrosting is still required, the entire process is faster and easier.

The fridge has 3 tempered glass shelves, 1 drawer, and 3 shelves on the door, while the freezer has 2 drawers with transparent doors.

A modern refrigerator with a smooth silver front and practical doors is simple, functional, and stylishly perfect for the kitchen.

Combined refrigerator CF-259ELF S

Thanks to the evaporator built into the freezer walls, which is completely invisible, ice buildup on the interior walls is significantly reduced. This leads to less frequent defrosting and ice melting needs. If defrosting is still required, the entire process is faster and easier.

The total capacity of 262 liters provides enough space for all the groceries.

In addition to energy-saving consumption, this refrigerator is also characterized by its quiet operation of just 39 dB.
